## A PERSONAL MESSAGE TO YOU

We thank GOD for the privilege of once more being in a position to offer you these spectacular and majestic flowering bulbs which you will find listed on the following pages.

It is very gratifying to us to know that our customers have been afforded a great deal of pleasure thru the past years from our sincere efforts to supply them with top grade and size bulbs of these gorgeous flowering AMARYLLIS.

Many are the obstacles that confront us in obtaining and distributing these bulbs such as unfavorable weather in country of origin, dock strikes on arrival of bulbs sometimes and subzero weather at the time we receive your valued orders to ship.

We trust that you will consider these things in the event that you do not receive your bulbs as quick as you expect in some instances.

Please order early, not only so that we can ship ahead of the low temperature weather but so that you are more certain of obtaining the varieties you desire. With the exception of a few varieties which lose their live roots quickly your early orders will assure bulbs with plump live roots reaching you in good order.

A handwritten signature in cursive script, appearing to read "C. J. C."

Our daily prayer — LORD make us a blessing to someone to-day and use us we pray for honor and glory for THEE alone, Amen.

## BOOKLET ON CULTURAL CARE OF IMPORTED AMARYLLIS

Our original paper bound copies of this helpful booklet available at 50c per copy.

At the time of this writing we are feasting our eyes on about 1000 stems (6000 blooms) of the exquisite pink LYCORIS SQUAMIGERA planted out on our Barnegat, N. J. place for display. What a sight to the eyes and one of GODS countless blessings to the soul.

AGAIN WE OFFER

LYCORIS MEMBERS OF THE AMARYLLIS FAMILY  
FROM JAPAN

LYCORIS MEMBERS of the AMARYLLIS FAMILY  
FROM JAPAN

LYCORIS squamigera, hardy Amaryllis halli often called the "MAGIC LILY of JAPAN" produce scented pale pink slightly tinged with lavender blooms on stems 24" tall in August.

Magic Lily

Foliage follows thru winter and spring dying off early June when bulb rests. Flower stems appear suddenly and alone (no foliage) therefore it is advisable to plant petunias or a similar plant in front of lycoris to detract from the naked flower stems.

6" circumference bulbs \$4.00 dozen.

7" circumference bulbs \$4.50 dozen.

LYCORIS RADIATA, the red spider lily produces delicate rich red blooms in September on 15" tall stems. This variety and L. Squamigera are hardy outdoors in the north, available at all times.

Blooming size bulbs \$3.00 dozen.

LYCORIS AUREA, beautiful golden spider lily blooms late

September or early October on stems to 18". This variety and the two varieties following are suited to outdoor growing from Richmond, Va. south and across the gulf states and on the west coast. Areas other than these they can be pot grown to do well in a cool greenhouse or indoors.

Blooming size bulbs \$5.00 dozen.

LYCORIS SANGUINEA, exquisite salmon pink blooms in late August and early September on short stems to 10".

Blooming size bulbs \$3.50 dozen.

LYCORIS RADIATA alba, the ivory white spider lily very rare and scarce. Real treat in the latter part of September of a number of blooms atop a 15" stem.

Blooming size bulbs 6 for \$3.50 dozen \$6.50.

All Lycoris varieties available at all times unless temporarily sold out of blooming size bulbs.

## TERMS

All orders accepted subject to availability of bulbs ordered. Occasionally due to conditions beyond our control and from selling out of specific varieties we are unable to supply named varieties ordered.

In this event we will substitute with the nearest desired variety unless advised to the contrary.

We usually have a second shipment of bulbs from LUDWIG only after the season starts so that any of their strain which is desired and that we have sold out of at the time your order reaches us can be obtained in this later shipment which arrives in January early.

While we pack our bulbs exceptionally well we will not ship an order if to our knowledge there exists a subzero condition where the bulbs are destined for until after the condition has modified.

Payment in a form convenient to you is required with each order. We guarantee safe delivery of bulbs to you unless you have such parcel post delivery that would require parcel to be exposed too long in low temperatures, rain or snow such as is the case with rural route deliveries.

While we guarantee bulbs to be true to strain, variety and size and to bloom the first season we beseech you to exercise patience since in many cases bulbs will flower normally to their full extent the second season after becoming well established the first season, however, in many other cases bulbs will do their best the first season specially if purchased early with ample live roots still intact.

Approximate earliest shipping date of Dutch hybrid Amaryllis late November early December.

The following photo is one of a very small part of the collection of these amazing Amaryllis owned and maintained by our very good friend and customer Mr. Edgar H. Wuest of New Jersey an avid Amaryllis lover.

Rear — LUDWIG'S SPLENDOR — PRINCE of ORANGE —  
and PRIVATE strain reading left to right.

Front — STRIPED BEAUTY — CRIMSON BEAUTY  
and ROYAL RUBY.

Mr. Wuest has one of the largest if not the largest private collection of imported named hybrid Amaryllis hippeastrum bulbs that we know of.

A true lover of these spectacular blooms and their bulbs and possessing more than his share of patience, tolerance and consideration all of which are necessary to obtain wholesome relaxation and pleasure to counteract the wearing pace of business in these hectic days.

Such attributes can naturally be expected from a person who truly enjoys the things of GOD.
